

When you see so much of pain, unhappiness, injustice especially towards children, you just can't be indifferent! You feel that you have to do something in order to make a small change...

How? Where shall I start?

Pray, desperately look for answers and find out what God reveals to you, see the solution and start doing something! So now you're working with children from social-vulnerable families at Day Center! Sharing God's Word changes lives of children, families and entire communities!

How to do the work efficiently, with quality and have a greater impact?

YFCM has the solution!

Ongoing trainings for day center workers!

This was YFCM's main event in May. We do such trainings twice a year. The goal is to gain knowledge in the working area with children. We equip our partner churches with the most necessary equipment in order to server children and young people in their communities, to be efficient and gain knowledge for this kind of work (social assistance, pedagogy, team work).

As the result, people leave our training with new knowledge, equipped and encouraged to keep working with new forces and engagements in order to do the work most efficient.

When people are trained, the work is efficient.

"And we know that all things work together for good to them that love God..." [Romans 8:28](#)

Lena from Mateuti says: *"My motivation is love for God and for children, this makes me work here. I feel I have to do something if I can be useful. My greatest desire is to see that God's seed brings fruit, young generation and next generation will trust in the Lord, take over our baton".*

"The Lord is my shepherd..." [Psalm 23](#)

Vasile from Medveja says: *"I am involved into Day Center work because I want to make children's lives better, to guide them on the right path. If we don't do it, the world will! I pray that God would discover Himself to the kids who don't know Him, and those who know the grace, to have the wisdom to understand the truth of the word".*

„Be ye followers of me, even as I also am of Christ" [1 Corinthians 11:1](#)

Roma from Drochia: *"The society says children are our future, I believe children are our present. They are the tomorrow society. Investing in children, I hope we'll have a brighter future on this earth and a hope that we'll all be together with Jesus. I pray that God would send more people who be pensioned for His work, that God would send awakening among young people, that Grace period would be prolonged in Moldova"!*

We are grateful that God can use us in His hands in order to grow our workers spiritually and professionally for His harvest!
